Why South Australia

Led by successful releases from a mixture of international, independent and established mid-sized companies, South Australia's game development reputation is thriving.

Significant tax incentives coupled with the lowest cost of doing business in Australia, a skilled talent pipeline, great Adelaide central business district studio site options and a fun, affordable lifestyle, our state is the perfect location for progressive game developers to open your next studio.

Saving you AUD$40 million

Establishing a game development studio in prime accommodation within the Adelaide central business district will save your company up to AUD$40 million over 10 years when compared with other Australian central business district locations.

South Australia was the first Australian jurisdiction to offer a tax offset for the video game industry, and its commitment to supporting the growth of the sector remains strong. The combination of state and federal incentives, and the lowest cost of doing business in Australia, sees South Australia rival Vancouver and Los Angeles as one of the most desirable game development centres in the world.

Skilled talent pipeline and visas

South Australia's world-class universities and vocational education and training institutions are committed to partnering with game development industry leaders to design courses that ensure creative talent for the future, producing 2,100 graduates in interactive software (VFX, AR/VR and games) in the last three years.

In addition, South Australia has the highest staff retention rates in the country and is experienced in supporting companies to bring staff with specialist skills and experience to Adelaide.

Studio sites

Our capital city Adelaide offers the lowest central business district accommodation cost in Australia. Many suitable sites are available in the Adelaide central business district, with sites up to 68 per cent cheaper than other Australian states.

"We're looking forward to further developing our partnership with the South Australian Government and appreciate the support so far. With Adelaide having so much potential for growth within the global games industry, the future looks very bright!"

Mr Tom Crago,
Director Keywords Studios Australia.

Incentives and rebates

Australia is committed to the growthof gaming companies, offering a 30 per cent tax offset to eligible companies. As the first Australian jurisdiction to offer an additional 10 per cent rebate for eligible projects, South Australia demonstrated to the international games community that we both understand and support the industry.

South Australian Government incentives

The South Australian Video Games Development Rebate (SA VGD Rebate) enables video games studios to claim 10 per cent of expenditure on video game development work undertaken in South Australia, on eligible project expenditure of AUD$250,000 or more. This is in addition to the Australian Government's 30 per cent Digital Games Tax Offset.

Australian Government incentives

The Digital Games Tax Offset is a 30 per cent refundable tax offset for eligible businesses that spend a minimum of AUD$500,000 on qualifying Australian games expenditure. This is one of the most significant game development incentives to be implemented world-wide.

Research and Development Tax Incentive

The Research and Development (R&D) Tax Incentive is a program that supports companies to increase their investment in R&D activities, with eligible companies able to claim an offset equal to their corporate tax rate plus a premium.

Investing in the future: Skilled talent pipeline and visa

Alongside industry-led training are three world-class public universities (the University of Adelaide, University of South Australia and Flinders University), each delivering undergraduate and post-graduate game design and development and VFX qualifications.

Joining the universities are internationally recognised private training institutions and vocational training providers including CDW Studios, the Academy of Interactive Entertainment (AIE), Adelaide College of the Arts and SAE Institute Adelaide, providing specialist technical courses. All our education and training providers work with companies directly to shape and influence courses to ensure they are relevant for the future needs of the industry.

The Government of South Australia has supported the state's game development sector through key initiatives including:

- research into best practice methodologies and course content to develop the industry's first Certified Digital Artist accreditation
- co-designing games course development and VFX micro-credentials with local industry to expand existing certificates and diplomas; and
- growth of local talent in world-class 2D animation, supporting local employers with essential skills.

"Adelaide has some of the best training for VFX creative and technical artists in the Southern Hemisphere, as well as a pool of experienced international talent that has moved here to work on big budget, tentpole blockbusters who now want to stay here. We have flexible visas with pathways to residency. Come and join us."

Specialist technical campuses

CDW Studios

CDW Studios is a design school offering study options in visual effects and entertainment, and a Bachelor of Creative Arts (Visual Effects and Entertainment Design) in conjunction with Flinders University. This degree combines a university education with the practical, hands-on experience of working in industry.

Instructors are current industry professionals with experience working for companies such as Disney, Blizzard Entertainment, Rising Sun Pictures, WETA, Wizards of the Coast, and Lego.

Academy of Interactive Entertainment

Australia's most awarded 3D animation, game design, film and visual FX educator.

Using state-of-the-art facilities, students learn the the latest in:

- filmmaking
- game development
- game programming
- 3D animation and visual effects education.

Adelaide College of the Arts

Adelaide College of the Arts is Australia's only tertiary institution housing the study of performing arts, visual arts and design, all in one building.

A campus of TAFE SA, South Australia's largest vocational education and training provider is designed to achieve excellence in arts training with industry-standard performance and exhibition spaces, workshops and studios.

SAE Institute Adelaide

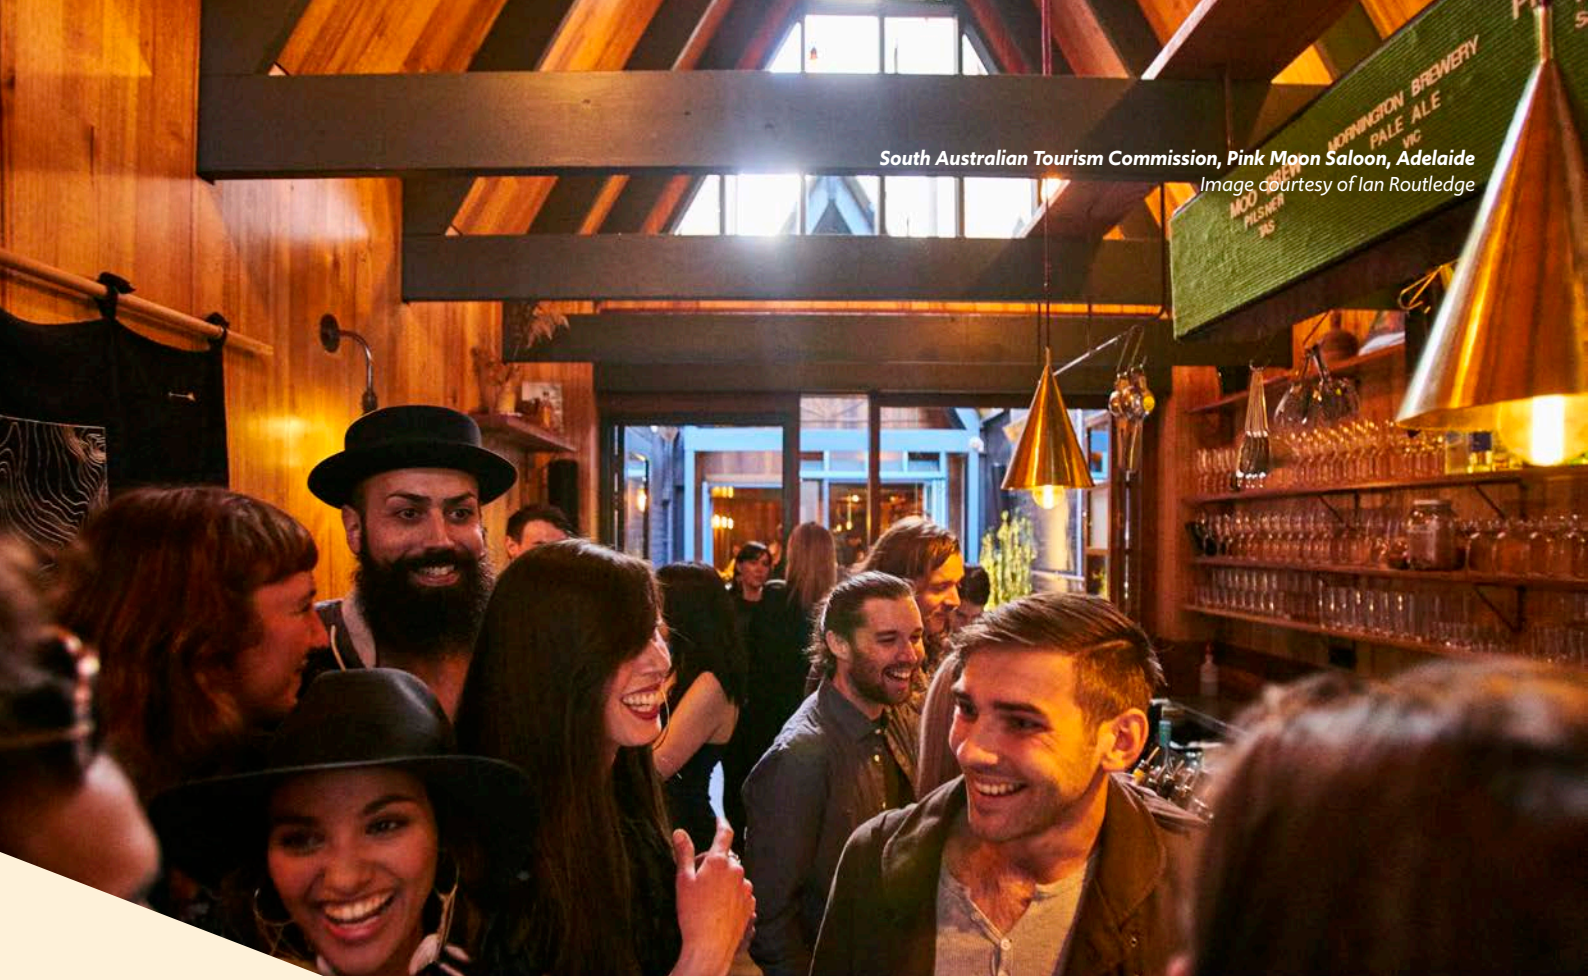

Provides specialist vocational and higher education courses worldwide. The new state-of-the-art, multi-level campus in Adelaide excels in programs across:

- animation
- audio
- creative industries
- design
- film
- games
- music.

Visas for international talent

The Government of South Australia can support companies to bring staff with specialist skills and experience to Adelaide via a state nomination process.

For skilled migrants, state nomination can assist them with qualifying for a skilled migration visa from the Australian Government Department of Home Affairs, providing additional points towards visa applications.

The South Australian Government, universities and local gaming industry are committed to advancing the games sector, skilling digital creatives for the future.

With increasing demand for visual effects technologies to be applied in a broader scope of industries including defence, manufacturing, cyber, space and health, South Australian universities and vocational education and training institutions are committed to continuous evolution of their courses and partnering with industry leaders to design courses that ensure creative talent for the future.

The interactive games sector in Australia has continued to grow, increasing another 5 per cent to over AUD$4.4 billion, after record breaking growth during COVID.[1]

South Australia has the perfect games ecosystem for attracting and retaining skilled talent. 63 per cent of Australian gaming companies are looking to hire more staff in 2024[2] and the Australian games sector is expected to grow 30 per cent over the next couple of years.[3]

South Australia has produced 2,100 graduates in interactive software (VFX, AR/VR and games) from tertiary and vocational education and training (VET), in the last three years.

"As a proud South Australian, it's incredibly exciting be opening of Tantalus South in Adelaide," said Mr Tom Crago, Director Keywords Studios Australia. We're on a steady path of growth and the talent pool in South Australia is up there with the best in the world."

Mr Tom Crago
Director Keywords Studios Australia

Game development ecosystem

South Australia is home to some of Australia's most exciting independent games studios including Tantalus South.

Tantalus South (Keywords Studios)

Keywords Studios, the world's largest provider of end-to-end technical and creative solutions to the video games industry, is the first AAA video gaming business to establish in South Australia, with its new Tantalus South studio in Adelaide's central business district.

Founded in 1998, and listed on the London Stock Exchange in 2013, Keywords Studios has over 12,000 employees worldwide across more than 70 offices in 26 countries and provides services to 24 of the top 25 video game publishers including Sony Interactive Entertainment, Microsoft, Google, Nintendo, Apple, Electronic Arts, Riot, SEGA, Sledgehammer and Ubisoft.

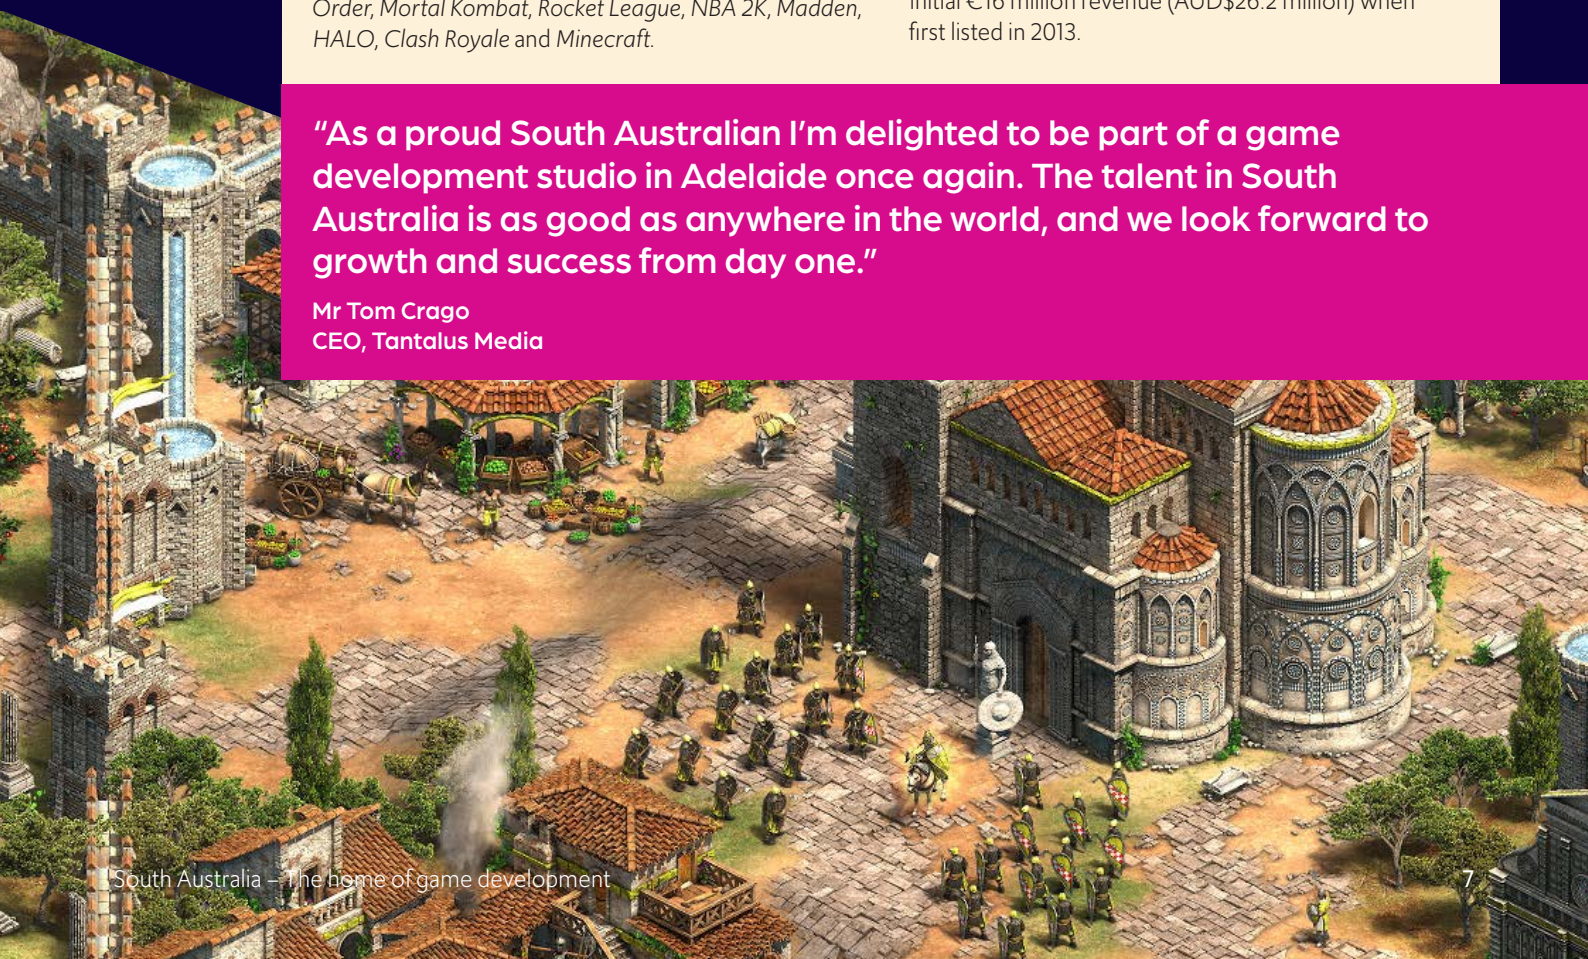

Keywords Studios has worked on some of the world's most played games, most notably global online video game sensation *Fortnite* as well as *Star Wars Jedi: Fallen Order, Mortal Kombat, Rocket League, NBA 2K, Madden, HALO, Clash Royale* and *Minecraft*.

The company plans to grow Tantalus South to 50 employees in its first three years and focus on developing AAA games for the world's best publishers including the *Age of Empires* franchise, *The Legend of Zelda: Skyward Sword and the Cities: Skylines* series. Tantalus South is already recruiting for roles across engineering, art, technical art, quality assurance and is in the process of developing training programs with local providers to offer graduates on-the-job experience as well as offering experienced staff the opportunity to upskill.

Keywords Studios' Adelaide move comes after the company opened an office in Melbourne last year following their acquisition of Australian game development company Tantalus Media. With the acquisition of over 60 businesses in the last 10 years and a dedicated focus on improving customer offerings, Keywords Studios recorded revenue of €691 million (AUD$1.1 billion) in 2022, significant growth from its initial €16 million revenue (AUD$26.2 million) when first listed in 2013.

"As a proud South Australian I'm delighted to be part of a game development studio in Adelaide once again. The talent in South Australia is as good as anywhere in the world, and we look forward to growth and success from day one."

Mr Tom Crago
CEO, Tantalus Media

Big Ant Studios

Big Ant Studios is Australia's leading developer of sports games.

Acquired by French publisher Nacon in 2021 for €35 million (AUD$57 million), Big Ant opened their Adelaide studio in 2023. One of the largest game developers in Australia, Big Ant Studios develop premium character action and racing content for platforms that include the Sony PlayStation 2, PlayStation 3, Nintendo Wii, Microsoft Xbox360 and PC.

Released in 2023, Big Ant Studios' most recent game *AFL23* is the most authentic and realistic video game football experience to date. It features the fully licensed 2023 AFL Premiership and AFL Women's competitions and over 30 detailed stadiums.

Cricket 22: The Official Game of the Ashes, released in December 2021, delivers the most robust, substantial game of cricket that fans have ever seen, with reviewers giving it a 9 out of 10 rating on Steam (July 2023).

Silksong by Team Cherry

Team Cherry

Silksong, Team Cherry's highly anticipated sequel to *Hollow Knight*, is consistently in the top three of the most wishlisted games on the Steam charts.

A recent new trailer of *Silksong* has the games world abuzz with its anticipated release. This will be the long-awaited follow up to their hugely successful first release *Hollow Knight* (2017).

Team Cherry started *Hollow Knight* as a small project when they first met at a game jam. Fleshing out the idea for *Hollow Knight*, they took to Kickstarter to crowdfund the game in late 2014, which saw them achieve double what they had asked for from just over 2,000 backers.

By November 2017 *Hollow Knight* sold over 500,000 units and in June 2018 surpassed 1,000,000 units in sales.

It was subsequently released on Nintendo Switch to continued success, selling 250,000 units in its first two weeks. It is now available in six languages.

Hollow Knight has now sold over 2,800,000 copies world-wide.

Team Cherry has no plans to leave Adelaide, believing the benefits of starting their business here are the same influences that will allow them to continue thriving.

"For *Silksong* we're running on Cherry-time over here," said Team Cherry. "That means both 'when it's ready,' and 'when it matches the quality and scale of *Hollow Knight*.' Just know, we will talk about a release date when we're 100% certain we can hit it... The last thing we want to do is make promises, only to see things slide. For now, we'll continue stuffing all sorts of strange critters and surprises into *Silksong*. We can't wait for you all to play it."

Team Cherry

Mighty Kingdom

Established in 2011, Mighty Kingdom has developed over 75 games and applications for mobile, console and PC to more than 50 million customers worldwide.

Mighty Kingdom has proven experience delivering multiple high-level projects for Disney, Funcom, Google, LEGO, Lion, Mattel, Moose Toys, Sony, Spinmaster, Snap and Uken across all platforms.

Notable releases from the company include licensed titles *Peter Rabbit Run* with Sony, *Shopkins* with Moose Toys, *LEGO Friends: Heartlake Rush* and *Gabby's Dollhouse* with Spinmaster, Netflix and Dreamworks, as well as original games including *Ava's Manor* with Canadian-based Uken Games.

Mighty Kingdom's *Star Trek: Lower Decks*, in partnership with East Side Games and Paramount, received the highly coveted Best Storytelling award at the Pocket Gamer Mobile Game Awards in April 2023. Among other awards, it was also 2019 Studio of the Year at the Australian Game Developer Awards. In April 2021, Mighty Kingdom listed on the Australian Securities Exchange (ASX), with the company successfully raising AUD$18 million on the beginning of its public trading.

Foxie Ventures

Horse Riding Tails is the number one mobile horse game in the world. Foxie Ventures has over two and a half million players per month and grew by 100 per cent in 2021, gaining third place in 2021 Fast Movers SA Top 25 Awards.

Connecting players to their passions and hobbies through original IP immersive family mobile games, Foxie Ventures games have been downloaded by tens of millions of players worldwide.

Founder and Director Dineth Abeynayake was recognised in South Australia's top 40 leaders at the annual 40 Under 40 Awards in 2021. Release-focused and dedicated to updating and creating new experiences within their existing games, Foxie Ventures have recently released their latest hit, Star Equestrian, rated 4.5 out of 5 (August 2023, App Store).

Hore Riding Tales by Foxie Ventures

We Made A Thing Studios

Featured at Gamescom in Cologne in October 2022 and a winner in the Aus Indie Showcase class of 2022 at PAX Aus 2022, We Made A Thing Studios is an award-winning production company that focuses on high concept IPs with global audiences.

They specialise in creative development, production, virtual production and multi-platform storytelling.

They build worlds.

Box Knight, their first video game, is a funny, silly and irreverent action RPG roguelike.

A mix of *The Office* and *Lord of The Rings*, by day you are just a normal office worker but when the clock hits 5pm on a Friday you become the Box Knight - protector of the office realm.

Fighter of evil beings and deliverer of beers! No matter what project, platform or creative, at the end of it, all We Made A Thing Studios want to do is sit back and proudly say... "we made a thing!"

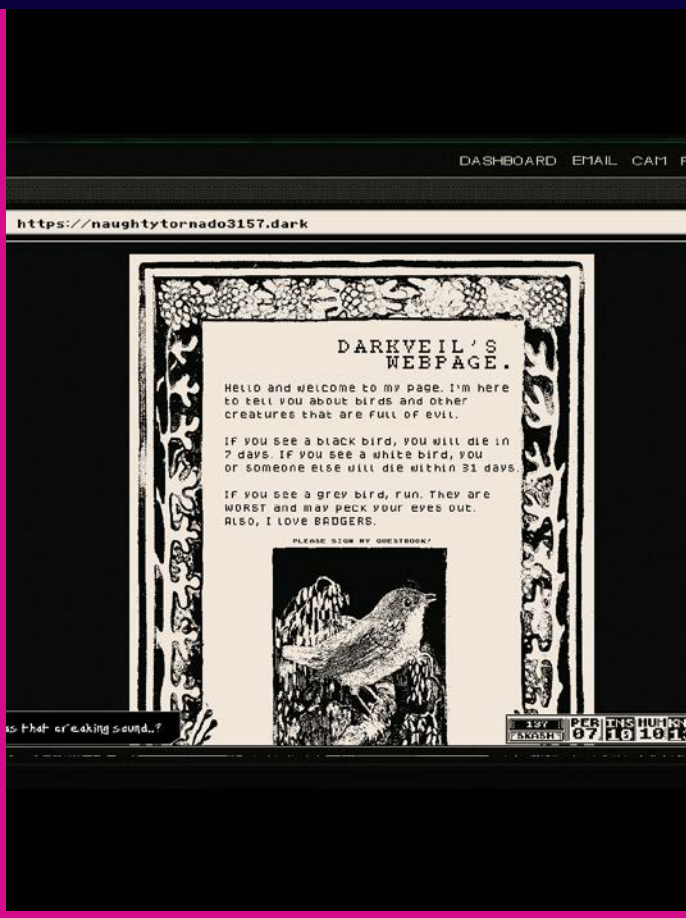

We Have Always Lived in the Forest

We Have Always Lived in the Forest is an independent game development studio innovating empathetic meaning-making AI systems in the production of avant-garde emergent narrative games.

Focused on developing cybernetic processes for emotion- interaction, utilising natural language processing (NLP) and artificial psychology (AP) techniques, their PC game *darkwebSTREAMER* is already gaining significant interest from gamers and investors alike.

Released in 2024, *darkwebSTREAMER* made IGN Entertainment's list of the *Best Little Games I Played* at Gamescom 2022, Kotaku's *10 Aussie Games That We Loved at PAX Rising* list and WellPlayed's *Best Games We Played at PAX Aus 2022*.

The occult horror RPG streamer game repping 90s internet vibes gives players the mission to become the number one ranked streamer - or die - and is powered by AI tech allowing for infinite possibilities for game play.

Half Giant

Half Giant is an award-winning full service animation studio specialising in game trailers and cinematics.

Half Giant's trailers include Australian Game Developer Awards' Game of the Year, *Cult of the Lamb*, which sold over one million units in its first week.

Using the perfect blend of animation and game capture, Half Giant has produced trailers for clients including Devolver Digital, Massive Monster, Mighty Kingdom, Mino, Future Play, Happy Juice, Cellar Door Games and Cranky Watermelon.

With the animation expertise of a high-end animation studio and a focus solely on games, Half Giant is the perfect local provider for your studio's releases.

Cult of the Lamb by Half Giant

Dino Rocket

Dino Rocket is a small Indie game studio based in Adelaide, creating games that they themselves want to play. The studio is currently developing its debut title *Kādomon: Hyper Auto Battlers*.

Kādomon: Hyper Auto Battlers is a monster taming auto battler with roguelike elements. With over 100 unique Kādomon to fight, collect, upgrade and evolve, players will have a wide variety of options to choose from when building their ultimate team. Discover different synergies to unleash wicked combos on powerful bosses.

Adelaide Studios

Located just 15 minutes from Adelaide's central business district, 30 minutes from Adelaide's international airport and close to South Australia's world-class post-production and visual effects businesses, the custom-built Adelaide Studios offer an ideal working environment for feature films and television series of varying budgets and is perfectly positioned to handle virtual production.

Managed on-site by the South Australian Film Corporation (SAFC), Adelaide Studios continues to draw high profile projects, including feature films *The New Boy, Talk to Me, Run Rabbit Run, The Unknown Man, Gold, Mortal Kombat, Hotel Mumbai, Cargo, I Am Mother, 2067, Storm Boy* and *The Babadook*, as well as TV series *The Tourist, Stateless, Pine Gap, Wanted* and *Wolf Creek*.

The facilities have been designed specifically to operate as an integrated hub and can accommodate virtual production set- ups.

Available facilities include:

- two sound stages
- Dolby certified mixing theatre
- virtual production capability
- Foley stage
- edit rooms
- production offices
- 100-seat screening theatre
- set construction workshop

For productions that require a larger footprint, the SAFC can facilitate access to additional warehouse space within easy distance of the studios and central business district. Adelaide Studios is also a buzzing hub for visual effects and screen creatives, housing more than 25 South Australian businesses from digital content creators to production companies, editors, casting and talent agents, animation studios, and more.

Join industry leaders

South Australia has a history of pioneering PDV and VFX capabilities. We are home to a unique range of production, post-production, game development and creative companies creating waves on the world stage.

Rising Sun Pictures

Rising Sun Pictures (RSP) is a cornerstone of the South Australian screen industry, having created some of Hollywood's most memorable screen moments over its rich 29-year history.

RSP has produced visual effects for the Harry Potter series of films, *Gravity, X Men*, and *Game of Thrones* all from its Pulteney Street studio in Adelaide. The past two years alone have seen RSP work on productions such as Disney's *Jungle Cruise*, Amazon's *The Boys*, Warner Bros.' *Mortal Kombat*, and Marvel's *Black Widow* and *Shang-Chi and the Legend of the Ten Rings*. The company's 200 strong team continues with its growth initiatives.

RSP's deep creative leadership makes it a trusted studio collaborator to the likes of Disney, Marvel, Warner Bros., Netflix and Amazon. It has an enduring history in innovation with the creation of the remote working platform, cineSync, which honoured RSP's Co-Founder and Managing Director, Tony Clark with an Academy of Motion Pictures Arts and Sciences Sci-Tech award in 2011.

To this day, technology and innovation are key components of RSP's success and remaining competitive: doing things smarter, not faster.

Elvis

Case Study – RSP's REVIZE – Leading the way in Machine Learning

Partnering for innovation: Rising Sun Pictures and the Australian Institute for Machine Learning (AIML)

RSP's mission is to be the trusted creative partner of filmmakers worldwide by solving complex challenges through creative excellence and technology innovation.

Partnering with AMIL, RSP has provided visual effects for recent global successes including Warner Bros. Pictures' *Elvis*, Marvel Studios' *Ant-Man and the Wasp: Quantumania*, *Thor: Love and Thunder* and Amazon Prime series *Lord of the Rings: Rings of Power*.

AIML conducts globally competitive research and development in AI, machine learning, computer vision and deep learning.

Leveraging cutting edge machine learning (ML) technologies and advanced VFX workflows, RSP launched its signature ML toolkit, REVIZE™.

The toolkit produces the highest quality VFX output for feature film, series and entertainment and has been used for a variety of digital ML augmentation, most notably face replacement, facial performance modification, de-aging, body replacements, and other likeness adaptations.

The REVIZE™ toolkit now includes:

- REVIZE™ Face – which includes cosmetic fixes, face replacement and facial blending between multiple performers
- REVIZE™ Body – which includes digital twinning, body replacement and size image and proportion manipulation

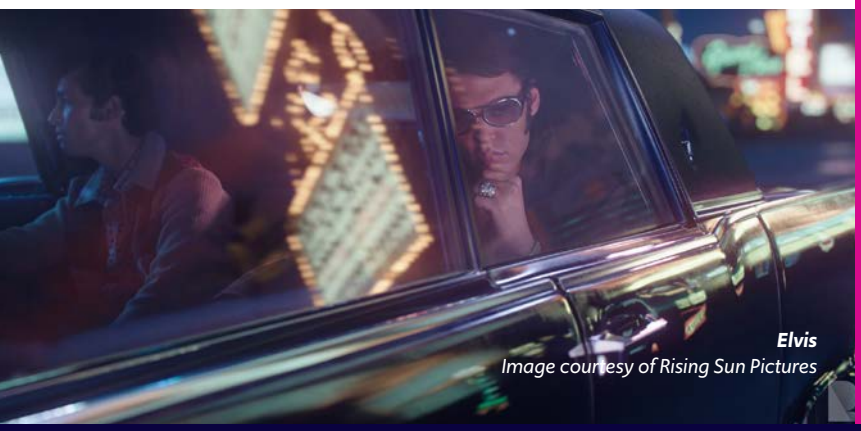

"Collaborating with AIML has enabled us to do what we have never been able to do before and proves to global studio executives RSP is among the best in the world at embracing and implementing advancements in technology such as AI."

Tony Clark, Managing Director
Rising Sun Pictures

Elvis

RSP's most novel work with AIML involved augmenting clips from several of Presley's movies, including *Live a Little, Love a Little* and *Girls! Girls! Girls!*, by using ML to fuse Austin Butler's features with Elvis Presley's.

The studio employed a stack of proprietary deep-learning software to analyse the facial features and expressions of both Presley and Butler.

Elvis
Image courtesy of Rising Sun Pictures

"Our technique combines machine learning and traditional visual effects. We did a lot of compositing work to adjust for small differences in physical appearance between Austin and Elvis. Austin has a slightly smaller frame and a narrower neck and shoulders.

His cheekbones are higher. It was an interesting blending of techniques and, ultimately, quite successful."

Julian Hutchens, VFX Supervisor
Rising Sun Pictures

Shang-Chi and the Legend of the Ten Rings

RSP's creative team worked with AIML to build novel machine learning techniques to replace a stunt performer's face with the actor's during martial arts fight scenes in Marvel Studios' blockbuster, *Shang-Chi and the Legend of the Ten Rings*. These results would not have been achievable 12 months prior without huge cost to both RSP and its clients.

Thor

RSP worked with AIML to create Baby Thor, a wholly-digital character, based on the real-life infant of a Marvel executive, created through animation and AI.

"The advantage of this technique over standard 'deep fake' methods is that the performance derives from animation enhanced by a learned- library of reference material," explains RSP Senior VFX Producer Ian Cope. "The result is a full screen photo-real Baby Thor storming in to battle."

An early adopter of AI, RSP used ML to give the baby an uncannily lifelike quality while exhibiting behaviours required by the script.

"Subtle nuances are what make a baby look like a baby," explained RSP Main Unit VFX Supervisor Dan Bethell.

"We had great references of the real baby and used them to get details right, such as how his mouth moves, and the way light reflects in his eyes. Over several iterations we honed the look and achieved a digital baby that audiences will accept as real."

Thor: Love and Thunder

Innovation districts

Our sectors co-exist in hi-tech hubs and research centres, forging collaborative ecosystems that open doors and inspire new ways of thinking.

Northern Sound System
27 kms from CBD

Youth-focused music and creative industries facility which includes three recording studios, 420-person music venue, Internet Broadcast Studio and GigCity internet.

Technology Park
17 kms from CBD

Hub for systems development and integration, information communications technology, advanced manufacturing and electronics, and home to over 100 small to medium enterprises, multinationals and start-ups.

Lot Fourteen
Adelaide CBD

Australia's first ideas and innovation neighbourhood and home to the Australian Space Agency, SmartSat CRC, Defence and Space Landing Pad, FIXE start-up hub, MIT Adelaide Living Lab, Australian Institute for Machine Learning and the Australian Cyber Collaboration Centre.

Gameplus
Adelaide CBD

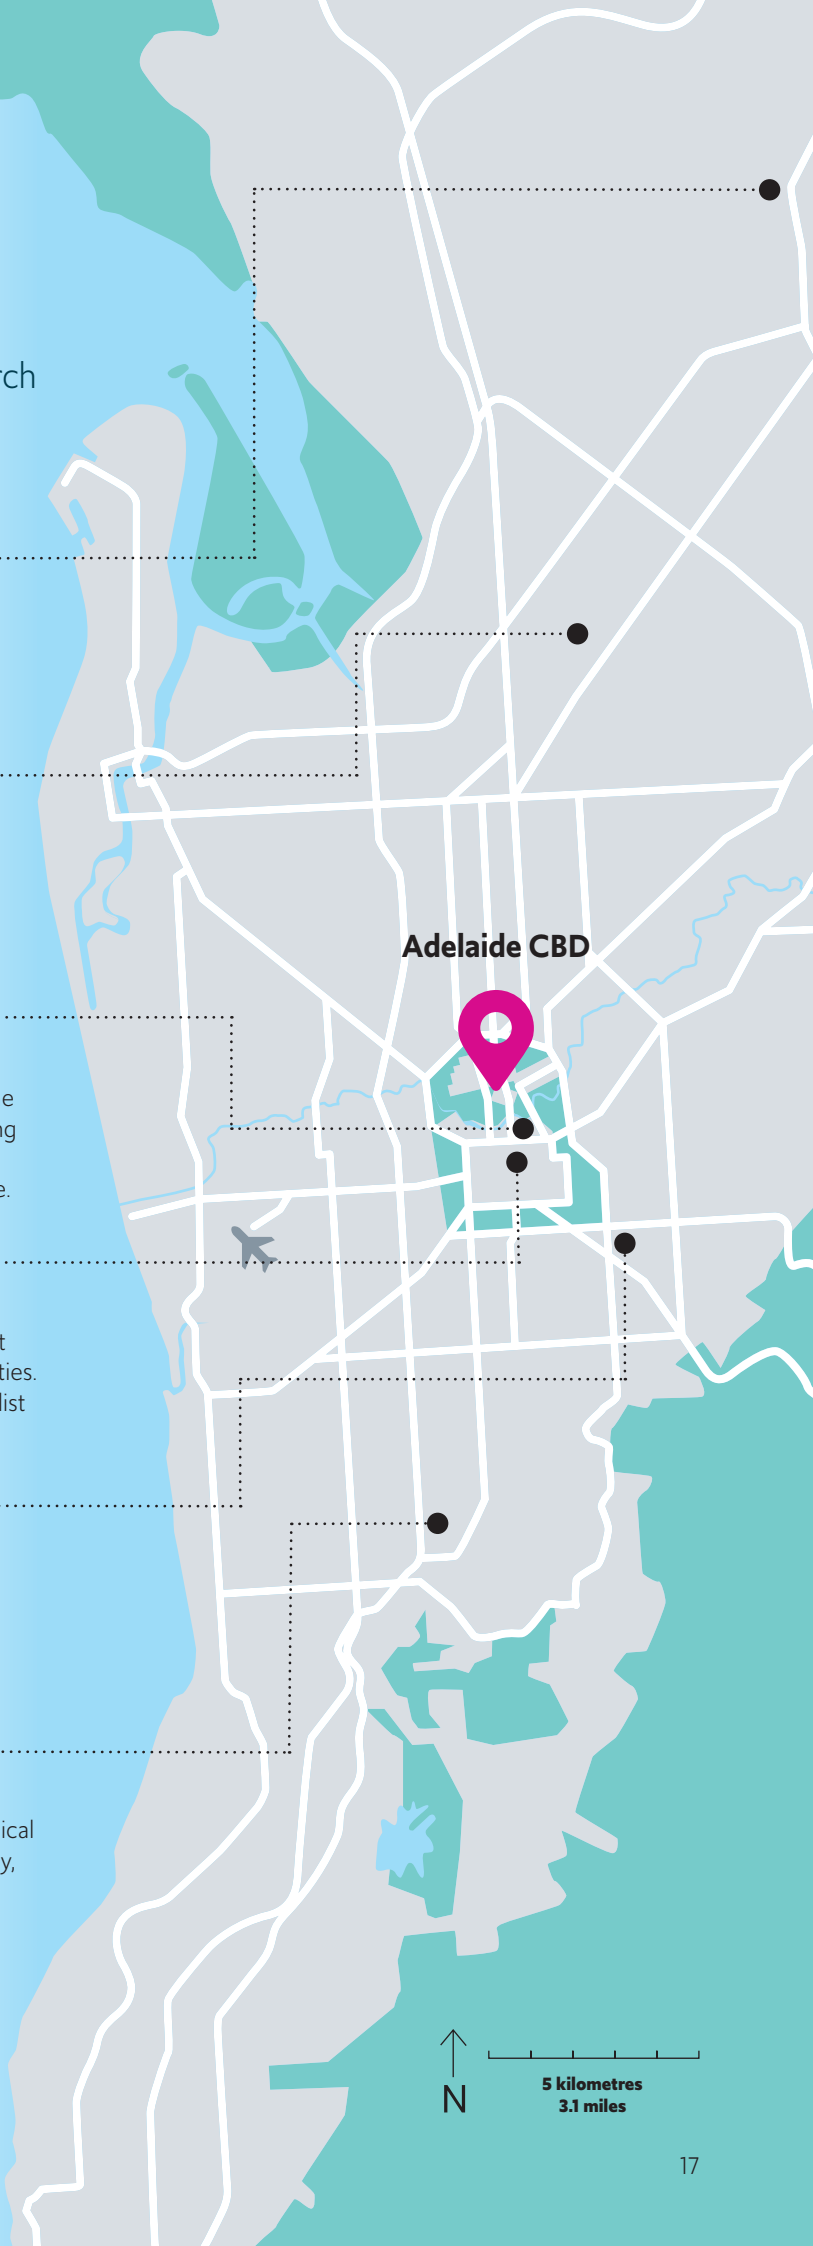

Collaborative workspace for game developers and related specialist technology start-ups to share resources, knowledge and opportunities. Also, a hub for government and industry to access a range of specialist expertise in interactive entertainment, simulation and training.

South Australian Film Corporation
4 kms from CBD

South Australia's leading screen authority and investment body, supporting the development, growth and promotion of the state's screen production sector through feature film, television and digital screen projects.

Tonsley Innovation District
12 kms from CBD

Home to high-value manufacturing industries including health, medical devices and assistive technologies, clean tech and renewable energy, software and simulation, mining and energy services.

Adelaide is among the global top 20 cities of its size for how many globally linked corporates it hosts.[4]

The world's largest technology companies have established AI-focused innovation hubs in Adelaide. These organisations are aligning their strategy for the next decade on the ability to deliver AI-focused projects and have selected Adelaide as the best location for cyber, AI and big data capabilities.

This leading innovation will continue to build around our connected technology ecosystem delivering well into the future to drive your global business.

Some of these global leaders are:

Accenture launched its Adelaide hub in 2021 with aimed workforce of 2000-person by 2025 focused on driving innovation in AI, data analytics and cyber security for the Asia Pacific region.

The company also entered a joint venture with the University of South Australia to create a Digital Academy.

Amazon Web Services established their Australian applied sciences team in Adelaide to work with AIML to develop new AI applications.

Avanade launched its first-of-its-kind Engineering hub in Australia to focus on the rapid delivery of Microsoft technology solutions while addressing skills shortage and improve diversity in the technology sector.

Cognizant opened its first Australian delivery centre in Adelaide in 2021, creating 1,600 digital roles with expertise in software, AI, machine learning, cloud computing, and data analytics.

Deloitte has pioneered Australia's first Center for Innovation and Technology, with an estimated workforce of 800 people. It has also partnered with the University of Adelaide to establish The Academy by Deloitte, offering intern experiences and specialised under-graduate courses.

MIT Connection Science, the world's leading data analytics capability, is partnering with the State to build our hi-tech capabilities in health.

MTX Group launched their first technology innovation hub in the APAC region in 2022 for 500 Adelaide-based staff.

Telstra Health's digital innovation and international growth functions are both led from Adelaide.

Zoho, one India's major technology services companies, opened its Adelaide office in 2024. The branch will serve as the company's key site across Australia and New Zealand and will expand its workforce to 50 employees by 2027.

Advanced technology infrastructure

Critical technology assets and digital connectivity have been a main driver of the state's strong performing economy. Our infrastructure capability is an enabler across all industries and reinforces the potential in VFX, AI and big data across the state.

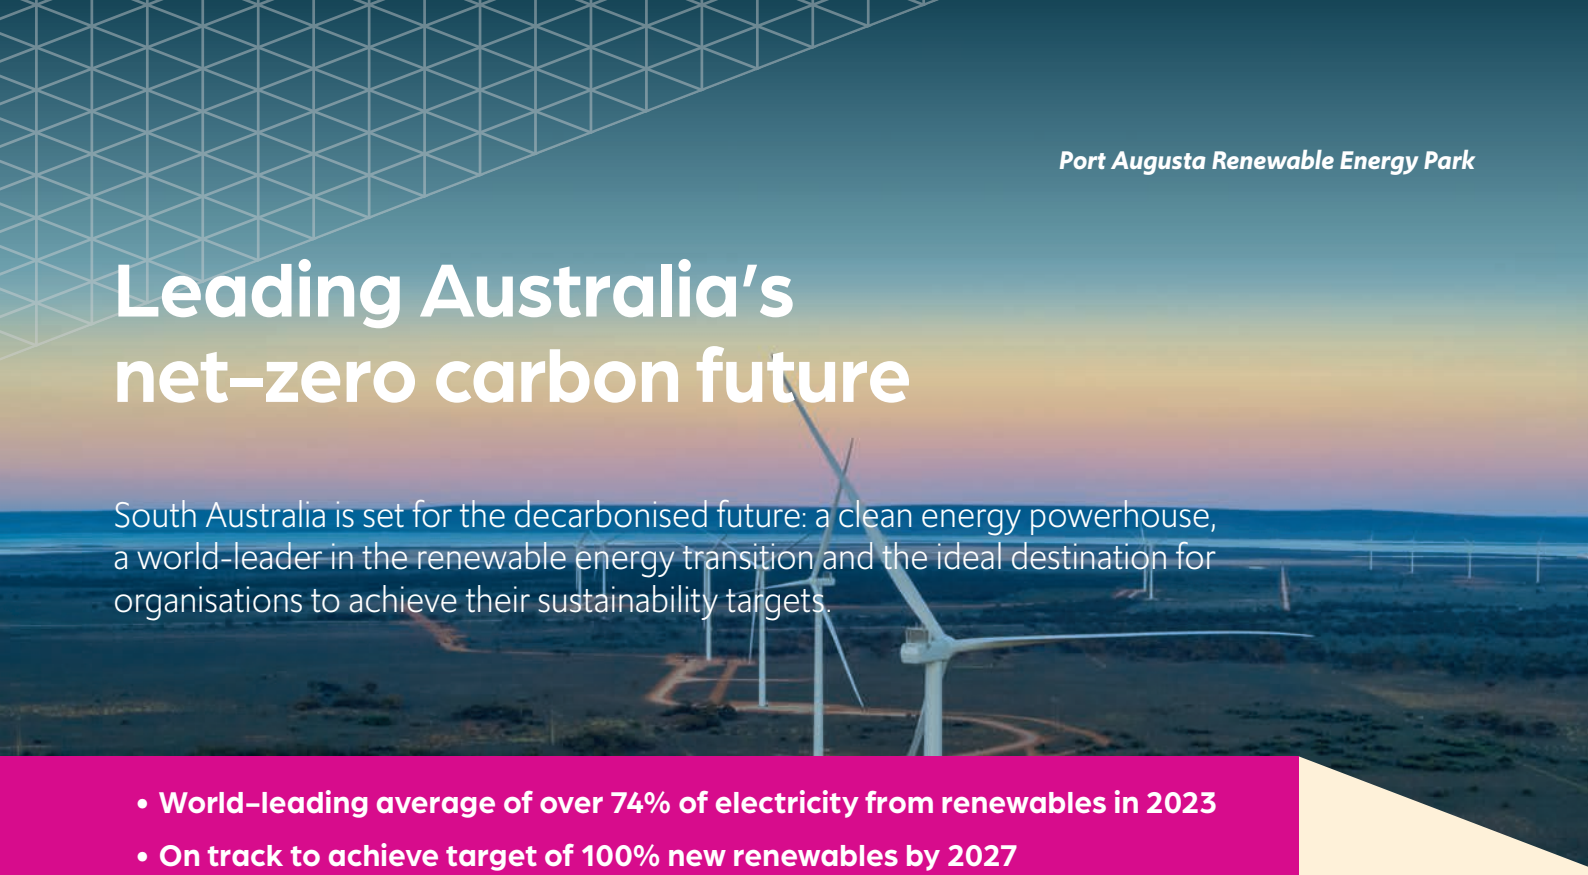

Cloud infrastructure in Adelaide is comprised of 24 colocation data centres, 177 cloud service providers, 24 network fabrics and 50 service providers. This includes award winning Equinix ISO 14001:2015 Green Certified data centres, NEXTDC Uptime Institute Certified Tier IV data centre and a Tier III data centre by Asia-Pacific leader DCI.

Ten Gigabit Adelaide is Australia's first city-side fibre optic network, offering revolutionary highspeed, high-performance fibre optic data network with 10Gbps speeds even with high volumes as each service has its own connection.

SABRENet is a fibre only telecommunications network supplying typical data speeds up to 100Gbps through its 400km fibre network and links South Australia's major education, research and innovation precincts.

SUBCOM SMAP Cable is a 5,000 kilometre transcontinental submarine cable connecting Sydney, Melbourne, Adelaide and Perth. Due for completion in 2026, it will be the first zero carbon long-haul cable system in the world and is expected to deliver 300Tbps per section at an extraordinary 15Tb/KW, making it faster and 25 times more energy-efficient than the legacy terrestrial inter-capital systems that currently exist along the same route, and provides higher uptime and security than any other Australian current connections.

[4] *Loughborough University – The World According to GaWC: www.lboro.ac.uk/microsites/geography/gawc/world2020t.html*

Port Augusta Renewable Energy Park

Leading Australia's net-zero carbon future

South Australia is set for the decarbonised future: a clean energy powerhouse, a world-leader in the renewable energy transition and the ideal destination for organisations to achieve their sustainability targets.

- **World-leading average of over 74% of electricity from renewables in 2023**
- **On track to achieve target of 100% new renewables by 2027**
- **On track to achieve target of 500% net renewables and be a national and international exporter of clean energy by 2050**
- **First Australian jurisdiction to achieve negative operational demand – that is, rooftop solar generated more eletricity than was needed for the entire state**

South Australia is a well-known leader in circular economy, innovation and renewable energy, leveraged by its strengths in AI, green energy and data capabilities, establishing as Australia's clean energy capital.

South Australia's renewable energy capacity and world-leading investment in hydrogen production along with its vast magnetite, critical minerals and rare earth elements resources provides the state with the globally unique potential to manufacture and export premium products for energy transition technologies and equipment, leading to the greening of industries and supply chains.

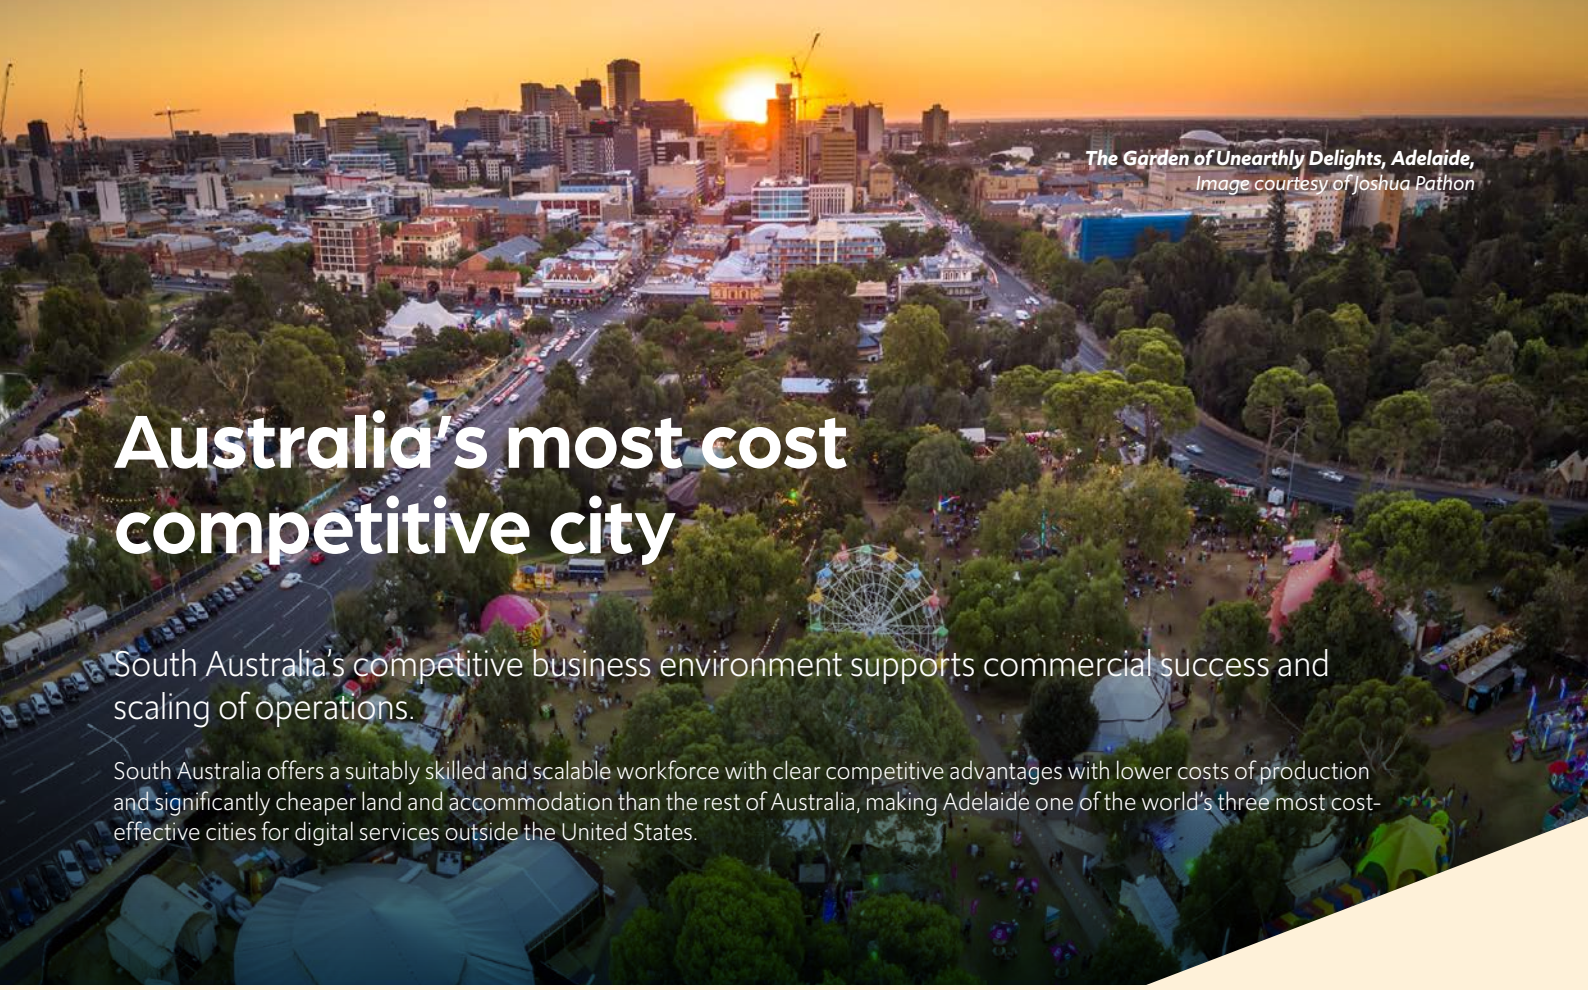

Reinforcing the state's energy transition credentials, The Government of South Australia has committed over AUD$600 million towards construction of new world-leading hydrogen projects including the *Hydrogen Jobs Plan* (AUD$593 million), shipping infrastructure and modelling tools for investors. Our state is also home to the Hornsdale Power Reserve, the world's original lithium-ion "big battery" and Hydrogen Park South Australia's 1.25MW electrolyser, Australia's first renewable gas project blending hydrogen and natural gas into the existing gas network.

This investment emphasises the unwavering commitment of the state government towards clean energy production and successfully demonstrates how good public policy can transform renewable outcomes, complementing actions such as the implementation of the *Climate Change and Greenhouse Emissions Reduction Act 2007*, making South Australia the first Australian state to legislate on targets to reduce greenhouse emissions.

South Australia has curated the perfect ecosystem for your business within the green economy to meet emissions targets and bolster your brand's sustainability goals and credentials.

> **"We are encouraged by the commitment of these gaming companies, which shows recognition that we all must play our role in the global effort to lower carbon emissions and effect real change towards sustainability."**
>
> **Inger Andersen**
> **Executive Director, UN Environment Programme (UNEP)**[5]

Australia's most cost competitive city

South Australia's competitive business environment supports commercial success and scaling of operations.

South Australia offers a suitably skilled and scalable workforce with clear competitive advantages with lower costs of production and significantly cheaper land and accommodation than the rest of Australia, making Adelaide one of the world's three most cost-effective cities for digital services outside the United States.

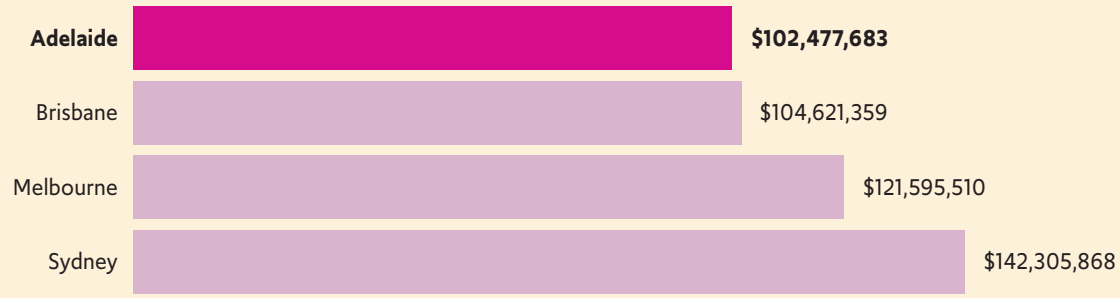

Cumulatively over a 10 year period, your project in South Australia presents an estimated cost saving of:

$39.8 million
when compared to the same operation in Sydney

$19.1 million
when compared to the same operation in Melbourne

$2.1 million
when compared to the same operation in Brisbane

Cumulative operational costs over 10 years

All costs are in AUD.

- *Cumulative costs - include estimated salary and office costs, tax offsets for the gaming sector and payroll tax*
- *Office space costs sourced from CBRE Research - Australian Office Space Costs 6/05/2024*
- *PDV grants are subject to minimum qualifying expenditure thresholds. Australian Government = $500k, SA = $250k, VIC = $500k, QLD = $250k, NSW = $500k.*
- *State rebate criteria are assumed to have been met*
- *Assumes 50 full time employees (FTEs) in year 1, 75 FTEs in year 2, 100 FTEs from years 3-10*

Enviable lifestyle

From the city to the sea, South Australia offers the ultimate living experience with something for everyone.

Our state is a prime living destination for young professionals and families alike, boasting a perfect combination of cultural experiences, picturesque landscapes, and a lively yet peaceful city centre, in a Mediterranean climate with warm, dry summers and mild winters.

Adelaide, our cosmopolitan capital city, has a thriving economy, is one of Australia's safest cities and is consistently ranked as one of the world's most liveable cities by The Economist Intelligence Unit Global Liveability.

Whether you choose city, suburban or country life, you are guaranteed a lifestyle that supports work-life balance, a supportive and family-friendly community and high-quality options for primary, high school and university students. The quality education credentials of the state's private and public schools are showcased in the latest release of The Better Education analysis of 2022 academic outcomes where both large 'super schools' and tiny campuses across South Australia achieved top results, with three of the state's high schools attaining a maximum 100 points score.

Culture and events

Our state hosts world-class events catering for all interests across, music, arts and culture, food and wine, wildlife, family fun or adrenaline pumping activities.

Key attractions including Adelaide Fringe, Tasting Australia, Adelaide Festival, Oz Asia Festival, WOMADelaide, cycling's Tour Down Under and LIV Golf.

With a year-round calendar of large events, entertainment, culture and excitement, Adelaide, is known as the Festival City, Australia's first and only UNESCO City of Music and in November 2023 was named 'Australia's Coolest city' by The Wall Street Journal.

Immersive nature and wildlife experiences

South Australia's unique mixture of landscapes is home to incredible national parks and wildlife reserves, combining stunning scenery with once-in-a-lifetime wildlife encounters. From the Flinders Ranges to the Outback region and Kangaroo Island, there is something for all types of nature-lovers looking for adventure.

The South Australian coastline is more than 3,800 kilometres long and offers conventional and unique aquatic activities. From fishing, boating and surfing on Yorke Peninsula to oyster harvesting and whale watching in Eyre Peninsula, it is one of the only places in the world where tourists can cage dive with great white sharks and swim with giant cuttlefish.

World-renowned gourmet experiences

From culture rich Adelaide to the lush Adelaide Hills; the bountiful Barossa to the Eyre Peninsula, South Australia's food and wine scene continued to receive nationally and internationally acclaimed awards in 2023 for our food, wine and experiences, including:

- Restaurant and Bar Design Awards; Australia and Pacific Best Restaurant, World's Best Bar Design – Luma (Adelaide)
- Gourmet Traveler Magazine; Australia's Restaurant of the Year and a member of The Worlds 50 best discovery list – Restaurant Botanic (Adelaide)
- LUXlife Magazine's Travel and Tourism Awards; Best Culinary Experience in the World – Watervale Hotel (Clare)

Family-friendly

South Australians enjoy access to premier eduction options and welcoming family friendly experiences, including dedicated children's festivals like DreamBIG Children's Festival, Adelaide Writers' Week Kids Day program and free entry for children under 12-years-old for WOMADelaide world music festival.

With our extensive offer of safe and clean swimming beaches, adventure playgrounds and national parks, and offering great lifestyle at an affordable cost, South Australia is the ideal state in Australia for families to live, work and play.

"We came to South Australia because we believe it is a great city for our employees to enjoy a healthy and balanced lifestyle, raise their families, and still have access to world-class festivals and entertainment".
